

Maternal Mental Health is a priority

2 in 10 women have a mental health problem during pregnancy and in the first year following the birth

Over 75% of women do not get diagnosed and do not receive adequate treatment and support.

Not having adequate treatment has important consequences for the mother, the baby, the family, and society in general

Why do we need to declare a World Maternal Mental Health Day?

- To give more **visibility** to this problem
- To combat social **stigma**
- To improve **detection** (diagnosis) and **treatment**
- To earmark more **resources** to maternal and infant mental health

Participate!

Join the campaign and spread the word!
